

## **Lyle Weichel, CEO WestSource Solutions Inc.**

### **Finalist for the Cameco Award for Young Entrepreneur of the Year**

Lyle Weichel is the co-founder of WestSource Solutions. Weichel works to provide green energy solutions to Saskatchewan residents and commercial / agricultural operations. WestSource has launched its simply green™ packaged energy solutions which includes green assessment, design, hassle free implementation, and operational support services. The WestSource E3 Modeling service provides customers with Energy Savings, Emissions Reductions, and Economics for their planned project(s).

As part of the simply green™ wind power generation solution the company supplies customer financing, remote monitoring services, screw pile foundations, and towers manufactured in Saskatchewan using 100% green electricity.

Weichel developed the business case for WestSource Solutions as part of the diversification of WestSource which started with WestSource Energy during in his 4th year of engineering. In 2008, WestSource finished 4th in the Progress2Capital Business Planning Competition.

Weichel still works on the original project that launched WestSource – the development of a utility scale wind farm in Saskatchewan – and is currently evaluating potential partnerships.
